Chartered Land Surveyor/ Chartered Minerals Surveyor

Index: Volume 1 1979

*Abdel-Aziz, Y I. An application of photogrammetric techniques to building construction 3,59
*Abstracts 1,56–59.2,59–61.3,59–61.4,61
*Accuracy analysis of stereo side-looking radar. F Leberl 3,60
*A coincidence procedure for the measurement of refraction-free directions. D Williams 1,56
A digitised sextant applied in a port using an automated system. Commander Barry Dixon and Captain Malcolm Ridge 1,51–52
*Admissibility in Court of photogrammetric products. A O Quinn 2,60
*Allen, Terry. Measurement at Hem Heath colliery 1,59
*Amin, M. A note on extreme tidal levels 3,61
*ANAPLOT History, basic features and performance 3,60
*An application of photogrammetric techniques to building construction. Y I Abdel-Aziz 3,59
Anderson, Malcolm F. Milton Keynes — a land survey commentary 3,40–49
*Andrews, G J. Re-establishment by resection to unco-ordinated points 2,59
*An integrated digital mapping system. J M Zarzycki 2,59
*A note on extreme tidal levels. M Amin 3,61
*A plotting instrument for close-range photogrammetry. S A Veress and J N Hatzopoulos 1,56
Apparent sea slopes — Ireland. John Dixon 1,46–50
*A recording altimeter for multiple base altimetry. H D Valiant and J F Halpenny 2,60
*A simple technique for photographing theodolite circle readings. E A Brady 1,57
*ASP-DTM Symposium 3,59
Atkin, David. Planning consent for deep mining beneath Warrington New Town 1,24–29

*Babbage, G. ISS the inertial surveying system 2,59
*Beaver, Paul E. Kent's mineral future 1,59
*Becker-Platen, J D. Geoscientific maps as an aid to land use and regional planning 1,59
Bell, Frederic G. Old excavations in coal seams 3,40–58
*Bell, Frederic G. Subsidence due to factors other than coal mining 1,58
*Bersham colliery laser unit mounting bracket. J Taylor 1,58
*Brady, E A. A simple technique for photographing theodolite circle readings 1,57

*Captain Cook and the crumpled echogram. C Mageau 2,61

Carter, Noel M. Town and country planning and environmental constraints 2,42–45
Coal mines, The disposal of mineral spoil and waste water from underground. H Gordon Glover 2,46–49
Coal mining on Warrington New Town planning, Impact of proposed underground. Tom Walsh 1,30–36
Coal seams, Old excavations in. Frederic G Bell 3,40–58
Common and statute law, The legal background. Cyril T Peach 2,35–41
*Computation of cyclic error of EDM instruments using pocket calculators. M Rueger 2,59
*Counselman III, C C and I I Shapiro. Miniature interferometer terminals for earth surveying 3,59
*Cox, R P. Shaft measuring at Sutton colliery: surface to low main seam horizon 1,59

*Dennis, E F. Post-construction survey monitoring methods: concrete clarifier tank 3,61
Design and subsidence precautions in the building and infrastructure of Warrington New Town. Peter Wilde 1,37–45
Digital cartography, Output and graphics with particular reference to. Michael J Stapleton 2,9–14
*Digital image processing techniques to extract metric data on buildings from shadows on simulated air photos. H Turner and D Steiner 4,61
Digital mapping in the Ordnance Survey 1968–78. Colonel Christopher N Thompson 2,15–28
Digital mapping system in production, Hunting. John D Leatherdale 2,29–34
Digitised sextant applied in a port using an automated system, A. Commander Barry Dixon and Captain Malcolm Ridge 1,51–52
Digitising system, The Laser Scan Fastrak automatic. Paul Hardy 1,17–20
Divisional Council (Photograph of members) 4,63
Dixon, Commander Barry and Captain Malcolm Ridge. A digitised sextant applied in a port using an automated system 1,51–52
Dixon, John. Apparent sea level slopes — Ireland 1,46–50
Dowman, Ian J. The future of photogrammetry in the electronic age 4,4–14
Dual rate mineral valuation principle index-linked, The. Edward G Hellewell 4,15–24
*EDM calibration — a scenario. A Sprent and P R Zwart 1,57
*Elfick, M H, J G Fryer and G A Pearson. Underwater 35 mm photogrammetry 4,61
*Enhancement of linear features by rotational exposure. D L Lawson and D F Palmer 1,57

*=Abstract.

*Estimation of the variance of centering errors. R Patterson 3,61

Fastrak automatic digitising system, The Laser Scan. Paul Hardy 1,17–20
*Ford, R A. The Division of National Mapping's part in the geodetic survey of Australia 3,60
*Fraser, C S. Identification of optimum meteorological conditions for EDM via potential refractivity 2,61
*Fryer, J G, M H Elfick and G A Pearson. Underwater 35 mm photography 4,61
Future of photogrammetry in the electronic age, The. Ian J Dowman 4,4–14

*Geodetic accuracy potential of the standard gyrotheodolite used in the non-tracking manual mode. H S Williams 4,61
*Geodetic positions by intersection. S Jalon 2,60
Geophysical surveys, Marine. Peter Simpson 3,25–35
*Geoscientific maps as an aid to land use and regional planning. J D Becker-Platen 2,59
Glover, H Gordon. The disposal of mineral spoil and waste water from underground coal mines 2,46–49
*Gnemmi, A E. Remarks on hydrostatic levelling 1,56
Gorham, Barry. RICS laser safety code 1,21–23
*Gruthal, M and J T Smith. Photogrammetry is many things 3,59

*Halpenny, J F and H D Valiant. A recording altimeter for multiple base altimetry 2,60
*Haraldstad, H S. Procedure of marking boundaries in Norway 3,59
Hardy, Paul. The Laser Scan Fastrak automatic digitising system 1,17–20
Harrison, John C. The LAMIS system 2,5–8
*Hatzopoulos, J N and S A Veress. A plotting instrument for close-range photogrammetry 1,56
Hellewell, Edward G. The dual rate mineral valuation principle index-linked 4,15–24
*High precision laser line-of-sight locators. Kh K Yambayev 4,61
*Hofmann, Von O. Mikroprozessoren im kartographischen und photogrammetrischen Instrumentenbau 1,56
Hunting digital mapping system in production. John D Leatherdale 2,29–34

*Identification of optimum meteorological conditions for EDM via potential refractivity. C S Fraser 2,61
Impact of proposed underground coal mining on Warrington New Town planning. Tom Walsh 1,30–36
Ireland, Apparent sea slopes. John Dixon 1,46–50
*ISS — the inertial surveying system. G Babbage 2,59

*Jalon, S. Geodetic positions by intersection 2,60
*John Adams, his map of England, its projection, and his Index Villaris of 1680. W Ravenhill 2,59

*Kent's mineral future. Paul E Beaver 1,59
*Kivioja, L A. New mercury levelling instruments 3,59
*Kumar, M. Significance of error in the assessment of crustal movements 4,61

LAMIS system, The. John C Harrison 2,5–8
Land survey commentary, Milton Keynes — a. Malcolm F Anderson 4,40–49
Laser safety code, RICS. Barry Gorham 1,21–23
Laser Scan Fastrak automatic digitising system, The. Paul Hardy 1,17–20
Lasers — how they work and applications in surveying instruments. Tim Slaven 1,3–16
*Lawson, D L and D F Palmer. Enhancement of linear features by rotational exposure 1,57
Law, The legal background: common and statute. Cyril T Peach 2,35–41
Leatherdale, John D. Hunting digital mapping system in production 2,29–34
*Leberl F. Accuracy analysis of stereo side-looking radar 3,60
Legal background: common and statute law, The. Cyril T Peach 2,35–41
*Lins Jr, H F. Some legal considerations in remote sensing 3,60
*Locke, K R. Programme PLEV — earth deformation vertical control surveys in the Taupo volcanic zone 3,60
*Lorenz, D and E Schmidt. Verfahren zur stereoskopischen Wolkenanalyse aus dem Weltraum (Methods of stereoscopic cloud analysis from space) 2,60
*Mageau, C. Captain Cook and the crumpled echogram 2,61
Mapping in the Ordnance Survey 1968–78, Digital. Colonel Christopher N Thompson 2,15–28
Mapping system in production. Hunting. John D Leatherdale 2,29–34
Marine geophysical surveys. Peter Simpson 3,25–35
*Marshall, A G. The application of radio wave techniques to precise offshore surveying with special reference to Tellurometer MRD 3,61
Marshall, I Arthur. Noise pollution from mineral workings 3,36–39
Martin, Colin. The survey of Namibia 3,3–24
*Masson D'Autume G de. Surface modelling by means of an elastic grid 2,60
McCulloch, Tom D W. Survey requirements of the 1980s 3,50–60
*Measurement at Hem Heath colliery. Terry Allen 1,59
*Methods of stereoscopic cloud analysis from space. Verfahren zur stereoskopischen Wolkenanalyse aus dem Weltraum. D Lorenz and E Schmidt 2,60
*Mikroprozessoren im kartographischen und photogrammetrischen Instrumentenbau. Von O Hofmann 1,56
Milton Keynes — a land survey commentary. Malcolm F Anderson 4,40–49
Mineral extraction: its impact on the environment, Surface. Douglas K Symes 2,50–58

Mineral spoil and waste water from underground coal mines, The disposal of. H Gordon Glover 2,46–49
Mineral valuation principle index-linked, The dual rate. Edward G Hellewell 4,15–24
Mineral workings, Noise pollution from. I Arthur Marshall 2,36–39
*Miniature interferometer terminals for earth surveying. C C Counselman III and I I Shapiro 3,59
Mining beneath Warrington New Town, Planning consent for. David Atkin 1,24–29
Mining on Warrington New Town planning, Impact of proposed underground coal. Tom Walsh 1,30–36
Munsey, David Thomas Foster (Obituary). John W Wright 4,62

Namibia, The survey of. Colin Martin 3,3–24
*New mercury levelling instruments. L A Kivioja 3,59
Noise pollution from mineral workings. I Arthur Marshall 3,36–39

Old excavations in coal seams. Frederic G Bell 3,40–58
Ordnance Survey and private sector surveying 1,53–55
Ordnance Survey Review Committee — main recommendations 4,25–33
Ordnance Survey Review Committee — RICS observations 4,34–39
Ordnance Survey 1968–78, Digital mapping in the. Colonel Christopher N Thompson 2,15–28
Output and graphics with particular reference to digital cartography. Michael J Stapleton 2,9–14

*Palmer, D F and D L Lawson. Enhancement of linear features by rotational exposure 1,57
*Papo, H and B Shmutter. Tank calibration by stereophotogrammetry 1,56
*Patterson, R. Estimation of the variance of centering errors 3,61
Peach, Cyril T. The legal background: common and statute law 2,35–41
*Pearson, G A, J G Fryer and M H Elfick. Underwater 35 mm photography 4,61
Photogrammetry in the electronic age, The future of. Ian J Dowman 4,4–14
*Photogrammetry is many things. M Grunthal and J T Smith 3,59
Planning, Impact of proposed underground coal mining on Warrington New Town. Tom Walsh 1,30–36
Planning and environmental constraints, Town and country. Noel M Carter 2,42–45
Planning consent for deep mining beneath Warrington New Town. David Atkin 1,24–29
Pollution from mineral workings, Noise. I Arthur Marshall 3,36–39
*Post-construction survey monitoring methods: concrete clarifier tank. E F Dennis 3,61
*Practical problems in marine engineering geophysical surveys. P Walker 3,61
*Precision surveying using radio interferometry. J W Ryan and others 1,57
Presidents' forewords 1,3
Private sector surveying, Ordnance Survey and 1,53–55
*Procedure of marking boundaries in Norway. H S Haraldstad 3,59
*Programme PLEV-earth deformation vertical control surveys in the Taupo volcanic zone. K R Locke 3,60

*Quinn, A O. Admissibility in Court of photogrammetric products 2,60

*Ramsayer, E K. Vergleich der Genauigkeit der Bestimmung ellipsoidescher Höhen durch astronomisch-trigonometrisches und astronomisch-geometrisches Nivelliment 2,60
*Ravenhill, W. John Adams, his map of England, its projection, and his Index Villaris of 1680 2,59
*Re-establishment by resection to unco-ordinated points. G J Andrews 2,59
*Remarks on hydrostatic levelling. A E Gnemmi 1,56
RICS laser safety code. Barry Gorham 1,21–23
RICS observations, Ordnance Survey Review Committee — 4,34–39
Ridge, Captain Malcolm and Commander Barry Dixon. A digitised sextant applied in a port using an automated system 1,51–52
*Ruëger, M. Computation of cyclic error of EDM instruments using pocket calculators 2,59
*Ryan, J W and others. Precision surveying using radio interferometry 1,57

Safety code, RICS laser. Barry Gorham 1,21–23
*Schmidt, E and D Lorenz. Verfahren zur stereoskopischen Wolkenanalyse aus dem Weltraum. (Methods of stereoscopic cloud analysis from space) 2,60
Sea level slopes — Ireland, Apparent. John Dixon 1,46–50
*Shaft measuring at Sutton colliery: surface to low main seam horizon. R P Cox 1,59
*Shaft measuring in the Doncaster area. R Trippitt 1,59
*Shapiro, I I and C C Counselman III. Miniature interferometer terminals for earth surveying 3,59
*Shmutter, B and H Papo. Tank calibration by stereophotogrammetry 1,56
*Significance of error in the assessment of crustal movements. M Kumar 4,61
Simpson, Peter. Marine geophysical surveys 3,25–35
Slaven, Tim. Lasers — how they work and applications in surveying instruments 1,3–16
*Smith, J T and M Grunthal. Photogrammetry is many things 3,59
*Some legal considerations in remote sensing. H F Lins Jr 3,60
*Sprent A and P R Zwart. EDM calibration — a scenario 1,57
*Stapleton, Michael J. Output and graphics with particular reference to digital cartography 2,9–14
Statute law, The legal background: common and. Cyril T Peach 2,35–41

*Steiner, D and H Turner. Digital image processing techniques to extract metric data on buildings from shadows on simulated air photos 4,61
*Subsidence due to factors other than coal mining. Frederic G Bell 1,58
Subsidence precautions in the building and infrastructure of Warrington New Town, Design and. Peter Wilde 1,37–45
Surface mineral extraction: its impact on the environment. Douglas K Symes 2,50–58
*Surface modelling by means of an elastic grid. G de Masson D'Autume 2,60
Survey requirements of the 1980s. Tom D W McCulloch 4,50–60
Symes, Douglas K. Surface mineral extraction: its impact on the environment 2,50–58

*Tank calibration by stereophotogrammetry. H Papo and B Shmutter 1,56
*Taylor, J. Bersham colliery laser unit mounting bracket 1,58
*The application of radio wave techniques to precise offshore surveying with special reference to Tellurometer MRD 1. A G Marshall 3,61
